EDUCATION

Northeastern University, Khoury College of Computer Sciences

San Jose, CA

Master of Science, Computer Science | GPA 4.0

Sep 2022—Dec 2024 Expected

Relevant Coursework: Data Structures, Algorithms, Object-Oriented Programming, Operating Systems

The Chinese University of Hong Kong

Hong Kong

Bachelor of Business Administration, Business Analytics & Quantitative Marketing

Sep 2017—Dec 2021

WORK EXPERIENCE

Software Engineer Intern, OurDate

July 2023—Present

- Developed a **Django REST Framework** backend API, with user authentication using **djoser** and **JWT**, including documentation. Configured admin-accessible **ChatGPT** prompts for A/B testing by non-engineers.
- Created a **React**-based frontend UI for the early-stage product, ensuring a smooth authentication flow using contexts and hooks. Enhanced code quality and consistency by implementing **ESLint & Prettier**.
- Built an **end-to-end** date plan sharing feature, boosting user engagements by 50%. Designed backend views and established data transmission to frontend routes, enabling sharing via links among partners and friends.
- Implemented **Stripe** for payments & subscriptions. Integrated **Slack API** with **webhooks** to alert channels, and leveraged **Rollbar** for production error logging, leading to an 80% boost in debugging efficiency.
- Demonstrated leadership skills through 6+ weekly **code reviews** on team members' PRs on GitHub, providing guidance in testing to ensure early issue resolution. Supported the **CI/CD** pipeline on **AWS Beanstalk**.

Data Engineer, Dashmote

Jan 2022—June 2022

- Developed web scrapers using **Scrapy** to extract raw data from 5+ delivery platforms. Processed extensive datasets (1M+ records) using **Python**, **Pandas**, **SpiderKeeper**, **Jupyter Notebook** and **AWS S3**.
- Collaborated with cross-functional teams to investigate low-quality data. Resolved issues via **SQL** queries, improving data accuracy by 9% through **Google Places API** research and experimentations.
- Automated data collection through **AWS S3**, **ECS**, **Lambda** and **EventBridge**, boosted efficiency by 90%.

PROJECTS

VocaBoost (vocabulary learning mobile app), *Co-founder, full-stack developer*

- Created an **iOS & Android app** with **React Native**, **Expo**, **Babel**, and **NativeBase**. Integrated **OAuth 2.0** and **OpenID Connect**, utilized **WebSocket** for real-time updates. Hosted backend on **AWS EC2** with **Docker**.
- Developed an **analytics server** with **Spring Boot**, **MongoDB** and **Prometheus** to store app's event history and monitor user behavior. Integrated **Grafana** for realtime data visualization.
- Implemented responsive user interfaces for **5+** devices, and achieved **1000+ downloads** on App Store.

MoveMakers (web API for dancers), *full-stack developer*

- Designed and developed a CRUD application using **FastAPI**, **SQLAlchemy** and **PostgreSQL**, containerized with **Docker**. Implemented **CI/CD** using **GitHub Actions** to automate deployment.
- Connected users to a database of dance-related information, authenticating users with tokens to ensure secure access. Authored **documentation** with code examples, serving as a user-friendly guide for developers.

SKILLS

Programming Languages: Python, JavaScript, Java, C, HTML, CSS

Frameworks: Django, Flask; React, React Native; Node.js, Express.js; Spring Boot; Scrapy, Selenium

Databases: MySQL, PostgreSQL, MongoDB, Firebase, Prometheus

Infrastructure: AWS, Google Cloud Platform, Docker

Operating Systems: Linux (Ubuntu), Unix

| Networking: TCP/IP, SSH, DNS
